# Flipped classroom

[source](#)

# Benefits of flipped classroom

---

- students can access content anytime
- watching video in their own pace - pause, replay
- students write questions at home
- students come to class prepared to ask questions
- teacher has more time to work on problems individually
- familiar - students today access knowledge through technology
- personalization of learning

# Steps to achieve flipped classroom

---

- getting students, parents and administrators on board with the idea
- choose resources (videos, spreadsheets, quizzes, presentations, devices, etc.)
- classroom management for the flipped class model
- technology training - teachers should know how to use different services for flipped classroom (create videos, playlists, etc.)
- assign content for homework
- work on problems in class with teacher acting as a moderator
- independent learning - students learn to critically study content at their own pace
- peer tutor - pairing advanced students with ones that have problems with content

# Flipped classroom tools

---

- video content
- social media
- devices
- links to docs, slides and sites
- books
